

# SOW SEEDS PRICE LIST 2012

## WELCOME TO SOW SEEDS

We are a small independent seed company based in Cheshire, offering the home gardener, allotment holder and commercial growers the finest quality seeds at great prices.

All our varieties have been carefully selected to give you the best taste and productivity from your vegetable patch or allotment.

## HOW TO ORDER

Sow Seeds is an 'Internet only' business and as such we can only accept orders placed online. To place an order or to find out more information about any of our seed varieties including full sowing information please visit [www.sowseeds.co.uk](http://www.sowseeds.co.uk).

Sow Seeds Limited is a DEFRA registered seed merchant; registration number: 7407

## OUR SEED RANGES

### CHILLI SEEDS

Our selected range of Chilli seeds productive, attractive plants and there's nothing like the satisfaction of growing your own produce and then having the pleasure of eating it! It's great fun!

### CUT FLOWER SEEDS

Our selection of Cut Flower seeds allows you to grow seasonal variations of colour & form to create different styles from country cottage to more contemporary arrangements.

### GREEN MANURE SEEDS

Green Manure is a crop that is grown mainly to benefit the soil rather than for food or ornament. It does wonders for the health of the soil and subsequent plants and it can save a fortune on compost.

### VEGETABLE SEEDS

We offer a fantastic range of vegetable seeds, selected to suit the home-grower or allotment holder for the best taste and productivity. They are better than the supermarkets, fresh to your door, grown locally and taste infinitely better.

### WILDFLOWER SEEDS

Wildflowers are a great way to brighten up a problem area and are great for the wildlife and the environment as well. Choose the correct mixture and spend a little bit of time and you will be rewarded with a beautiful wildflower meadow.

## USEFUL INFO

### AGM SEEDS

The Royal Horticultural Society's Award of Garden Merit (AGM) helps gardeners make informed choices about plants. This award indicates that the plant is recommended by the RHS.

### F1 SEEDS

Plants grown from F1 'hybrid seeds' tend to grow stronger and have greater survival rates than their homozygous relatives. These plants need fewer pesticides and other chemical treatments to survive and that's good for the environment.
